

Law Enforcement and Mental Health Data Sharing

Joint Legislative Oversight Committee on Health and
Human Services and the Joint Legislative Oversight
Committee on Information Technology
December 13, 2011

Robert Brinson

Chair, Criminal Justice Information Network
(CJIN) Board and CIO, Correction

Examples of CJIN at work

At our last meeting, we worked on:

- Two-factor authentication with the FBI
- Connecting regional criminal incident reporting systems with NCIS, Charlotte, NC-based records vendors executives, SC, VA
- Future opportunities for law enforcement and first responders with the E911 Board
- Leveraging geographic data with NC One Map
You have an example agenda, minutes and database.

Health Data Sharing Need

- Defendant sent to mental hospital for psychiatric evaluation
- Law enforcement dealing safely with mentally ill offenders
- DHHS needs to know who on their caseload has been booked in a jail to make sure they receive medication
- Medicaid needs jail and Correction information as part of determining benefits

CJIN Board Next Steps

- We will ask our staff to talk with the stakeholders and identify the scope of the issue
- We will look at where the data can be housed
- May be opportunities for CJLEADS as well as services out of individual agency databases
- We understand there are patient's rights issues
- We understand there are security issues around storing the data and limiting who needs to see the data
- We will bring back a better problem statement and a set of recommendations
