NOTES: Reference to the report not yet assigned. I read the report and could not conclude if all parties were accounted for and identified. I read that there was a balding black male with a knife in the report but I did not see where that male was positively identified? I then located [REDACTED] who was on scene or near scene at or about the same time as crime.

This may be a potential Involved Party or Potential Witness. His Ankle GPS puts him within (8) Feet of the crime location.

BLOOD GANG MEMBER WHO FREQUENTS RALIGH BUT IS ON PROBATION ON HARNETT COUNTY

Notes: I have opted to Map ——— for 1 week after I detected he visits Raleigh Area Locations but resides in Harnett County. I thought the tracking would potentially be valuable in knowing where his hang outs are since he is a Gang Member with a past history of drugs and robbery. Even though White Oak Theater is not in our jurisdiction I found that visit to be very concerning since his movements are constant, he doesn't watch a movie and walks the entire complex to include the rear of the building to the interstate fence.

DRUG SUSPECT MAPPING

I discovered that _____ was involved in a drug transaction report. As a result, I began to map the suspect to determine the value of where he goes and who he knows. I mapped the locations that were found to be suspicious and pertinent. This was done in an effort to aid in past, current or future investigations.
